

Team 4: Cross that Bridge

Problem Description:

Michigan is currently rated a C- in bridge infrastructure from ASCE's Infrastructure Report Card due to many bridges in poor condition.

Project Description:

We are designing a new bridge in west Michigan that will meet specific code and design criteria. The goal of this bridge is to preliminarily replace a current bridge in poor condition and improve accessibility in the community. We want our bridge to be aesthetically pleasing while keeping all functionality.
