POST-INDUSTRIAL SPACES: THE NEW CITY AND WHAT WAS LEFT BEHIND

Friday, April 16, 2021 at 3:30PM on Zoom

SPEAKER: DR. MARK BJELLAND
Professor of Geography and Environmental Studies, Department of Geology, Geography and Environmental Studies, Calvin University

Post-industrial spaces—former factories, warehouses, railyards, and shipyards redeveloped for new uses—offer important windows into both urban change and broader social changes. While they comprise a small percentage of a city's land base, post-industrial spaces play a prominent role in reimagining urban landscapes, modeling sustainable urban futures, and highlighting emerging economic and demographic realities.
