

Team 9: Package Lockers for Mail Services

Team Members (From Left to Right): Peter Peng, Sam Mayfield, Sawyer Travis

Our project is to implement a package locker system for the dorms and apartments on campus. Currently, students can only pick up their packages at the desks from 4-6pm. With package lockers, students will be able to pick up their packages 24/7. Calvin mail services is interested in our project. We are looking to build a locker system and integrate it with their current package delivery and tracking systems.
