Team 17: Inertia

Our Project
We are building a transformative 3D printer from the ground up. We are making our own motherboard and selecting a series of extremely high tolerance parts combined with our own precision-machined custom parts to net us tolerance on the levels of printers 100 times more expensive.

Design Objectives
- User friendly
- Highly accurate
- Extremely fast
- Seamless web printing
- Extremely efficient
- Responsive gui
- High tolerance
- High print quality
- Extremely reliable
