

Data Science Cognate Tracks

A Data Science student must complete a cognate, consisting of at least 15 hours, with the same disciplinary prefix (BIO, BUS, ECON, GEOG, POLS, etc.) other than CS, MATH, or STAT, and with at least 6 must be at the 300-level, unless a department recommends otherwise.

This document provides a current list of course tracks that departmental representatives have recommended as especially appropriate for a Data Science major. Students may also combine courses with different prefixes with the approval of their advisor (who must be a member of the Data Science Steering Committee).
