

CLASS OF 2018 CAREER OUTCOMES REPORT

METHODOLOGY

Data were collected for a 15-month period beginning August 2017 and ending November 2018.

This report includes Calvin College graduates from August 2017 through May 2018. The statistics in this report are based on information received through multiple sources, including the following reporting methods:

- Senior Class First Destination Survey
- Faculty and staff reporting
- Email communication
- LinkedIn

Department chairs and faculty were asked to gather information on graduates who had not reported. In June 2018–November 2018, the Career Center followed up with graduates.

Internship information was obtained from graduate surveys and the Career Center's college-wide internship database.

My internship at small manufacturing company gave me exposure to multiple engineering disciplines. I had projects in quality, industrial, manufacturing, and packaging engineering. This breadth of experience allowed me to not only narrow down my job search, but also see the systems within the company in a broader sense. My internship taught me how to be creative and organized in the workplace, both of which are important in my current job.

—Melanie Fox, Engineering '18

Through an internship at Eidex—a company that uses data analytics to improve K-12 education—I was able to build on my programmatic thinking and skills, specifically in SQL, Python and Excel. I was hired full-time at Eidex following graduation, and after a year, I transitioned to a role as a Data Warehouse Development Analyst at Spectrum Health, where I continue to apply critical thinking and SQL skills, now in the healthcare industry.

—Grant Drukker, Math./Bus. group major '18

Notes for major/program tables

1. Double majors/multiple majors are counted for each major completed.

2. Programs with no majors are excluded.

3. Internship participation ratio is based on the total grad count.

4. Graduates of the Masters of Education, Accounting, and Speech Pathology programs are not included in the reports.
